

Copenhagen, 1<sup>st</sup> December 2017

The process leading up to the creation of a new company; DanAvl P/S, has been concluded, meaning that the new DanAvl is a reality from 1<sup>st</sup> December 2017.

The company will go into operation from early 2018.

One major result of the creation of DanAvl P/S is that the commercial management of the DanAvl value chain will be transferred to the new company. This includes the management of relationships with DanAvl multipliers, AI stations and agents as well as end-users/customers, pig producers around the globe.

The majority share of DanAvl P/S, 51%; is owned by Danish Agriculture & Food Council, with DanBred International and Danish Agro each holding a minority share of 24.5%.

The responsibility for DanAvl breeding R&D-activities remains with The Danish Agriculture & Food Council.

All DanAvl customers will be contacted presently, but all customers are always welcome to contact their local DanAvl representative via +45 3841 0141.
